YOUR FEED BACK - OUR RESPONSES – DEVELOPMENTS

We want to act on your feedback and concerns and Develop them to help create a better, safer and quieter environment for all.

You Said	We Did
Site Security	We have increased the number of monitored CCTV Remote Systems which are linked to the Police and finger-print access to construction areas is working well.
Parking	We have taken possession of land at the Gas Works for a site car park to reduce the site traffic entering/ leaving at the start and end of the day on Ashburn Road Entrance.
The Beck	We are aware of the importance of Scarborough's water baffles located just 1km down stream. we are taking daily samples in the Beck and will continue to monitor as work near the Beck develops. We are undertaking hourly inspections on the Beck to visually monitor the water quality.
Road	With the reduced traffic levels on site, we have also reduced the amount of 'Dirty Traffic' on Ashburn Road, we are reducing the number of deliveries into site, if goods can be unloaded inside gate the vehicle will not need to drive onto the main site.
Habitat and surveys	Over the next few weeks we will be carrying out work with the <i>Scarborough Yorkshire Wildlife Trust</i> this will also engage some of our local Apprentices, if you would you like to get involved and join us making a difference in your area please let us know?
Noise from Concreting operations	Floor Level Concreting is now competed across CUSC and UTC which was carried out with no power floating hence all noise was eliminated during out of hours.
<p>Willmott Dixon Holdings Ltd are forever striving to create Thriving Communities, Improve Site safety and to develop local welfare, as part of this project we have recently installed a Defibrillator in or Site office, some team members have been fully trained on the unit and the device is registered with the local authorities for use off site if required</p>
